Pedestal mailboxes will be removed from front locations on West Newton Street and will be relocated to the rear of West Newton Street.

- Concrete which was poured to install front mailboxes will be removed and surface will be restored to the condition in place prior to installation of pedestal mailboxes.
- Front yards will have mulch installed.
- Fences where cut, will be restored to condition in place prior to fence cuts which were performed for the pedestal mailbox installation.

USPS has denied moving the Rutland mailbox to the rear due to the added time it would take carrier to deliver. We propose to retain the pedestal mailbox at the 62-64 Rutland front location and add top and base covering to the mailbox.

- Front yard will have mulch installed and one shrub planted adjacent to the mailbox.
-
