Report Contents

Summary

- Neighborhood Levels and Trends
- Citywide Overview and Trends
- BPHC Trend Overview by Neighborhood
- Citywide Percent Variant Lineages

Detailed Results

- Neighborhood Levels and Data Table
- Results by Neighborhood
 - Allston/Brighton
 - Back Bay
 - Charlestown
 - Dorchester
 - East Boston
 - Hyde Park
 - Jamaica Plain
 - Mattapan
 - Roslindale/West Roxbury
 - Roxbury
 - South Boston

Additional Information

- Site Status and Details
- Level and Trend Category Definitions
- Recommendations and Resources by Level

Level: **Very High**

Level: **High**

Level: **Moderate**

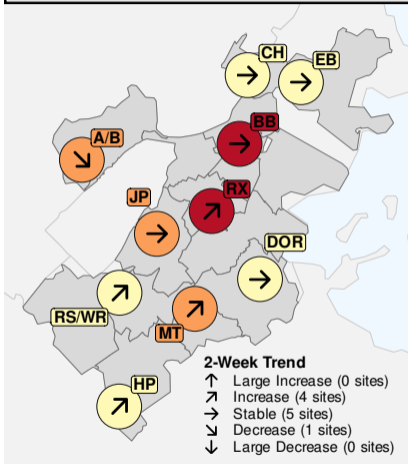

Level: **Low**

Level: **Very Low**

+11%
over the past 14 days

MWRA North
Stable

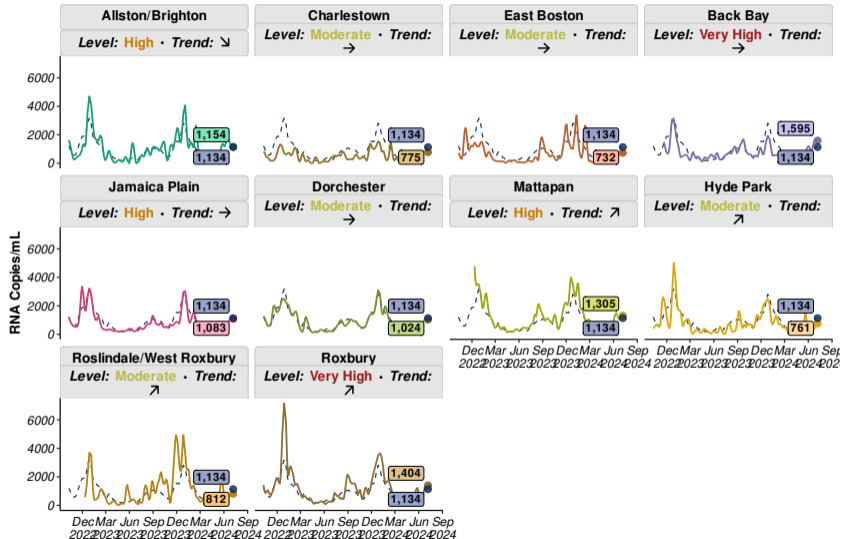

+5%
over the past 14 days

MWRA South
Stable

+21%
over the past 14 days

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (BPHC); 02-Jul-2024 (MWRA) | MWRA Data: <https://www.mwra.com/biobot/biobotdata.htm>

BPHC Trend Overview by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line and dark blue text box in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

To see details and interpretation of these results for an individual neighborhood see [Results by Neighborhood](#).

Citywide Percent Variant Lineages

Variant	%
BA.2.86	0.9%
JN.1	30.1%
JN.1.13	0.4%
JN.1.7	0.0%
KP.2	30.5%
KP.1.1	5.3%
KP.3	6.2%
Other	26.7%

Average variant percentage across all BPHC sites weighted by population size | Table shows variant percentages for samples collected the week of 23-Jun-2024 (most recent available data); Variant results are reported weekly with a 3-week lag due to laboratory processing and analysis.

Sequencing Analysis Protocol Version: v1.16 (13-Jun-2024):

- "Other variants" contains all variants not explicitly quantified.

Version Changes: Added: JN.1.7, KP.3

Removed: XBB, EG.5

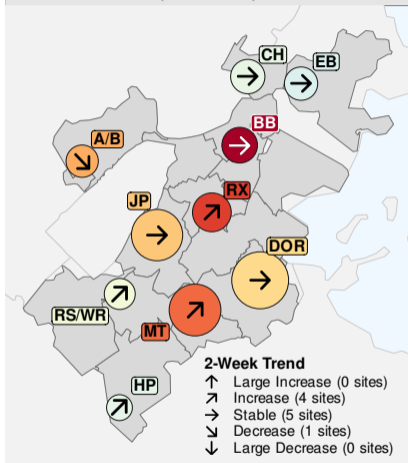

For Additional Info See:

<https://www.biobot.io/covid19-variants-report-notes/>

Neighborhood Levels and Data Table

COVID-19 Wastewater Levels & Trends
(07-Jul-2024)

NH	COVID-19 Wastewater Levels		2-Week Trends		
	Conc. (copies/mL)	Level	Trend	Diff. (copies/mL)	% Change
BOSTON	1,134	High	Stable	+116	+11%
BB	1,595	Very High	Stable	+96	+6%
RX	1,404	Very High	Increase	+244	+21%
MT	1,305	High	Increase	+274	+27%
A/B	1,154	High	Decrease	-351	-23%
JP	1,083	High	Stable	+95	+10%
DOR	1,024	Moderate	Stable	+21	+2%
RS/WR	812	Moderate	Increase	+155	+24%
CH	775	Moderate	Stable	-16	-2%
HP	761	Moderate	Increase	+403	+112%
EB	732	Moderate	Stable	+85	+13%

Concentration Levels: Very High: >1,400 copies/mL; High: 1,050-1,400 copies/mL; Moderate: 700-1,050 copies/mL; Low: 350-700 copies/mL; Very Low: ≤350 copies/mL

2-Week Trend Categories: Large Increase: >+500 copies/mL; Increase: +150 to +500 copies/mL; Stable: -150 to +150 copies/mL; Decrease: -500 to -150 copies/mL; Large Decrease: ≤-500 copies/mL

Results by Neighborhood

- [Allston-Brighton \(A/B\)](#)
- [Back Bay \(BB\)](#)
- [Charlestown \(CH\)](#)
- [Dorchester \(DOR\)](#)
- [East Boston \(EB\)](#)
- [Hyde Park \(HP\)](#)
- [Jamaica Plain \(JP\)](#)
- [Mattapan \(MT\)](#)
- [Roslindale/West Roxbury \(RS/WR\)](#)
- [Roxbury \(RX\)](#)
- [South Boston \(SB\)](#)

Allston/Brighton

Level: **High**

- Average value in A/B over the past week: **1,154** copies/mL.
- This value is **high** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: **↘ Decrease**

- Over the past two weeks, values in A/B are **decreasing**.
- Change compared to two weeks ago: **-351** copies/mL (**-23%**).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (A/B);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Back Bay

Level: **Very High**

- Average value in **BB** over the past week: **1,595** copies/mL.
- This value is **very high** compared to past values and **higher** than the citywide average (**1,134** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **BB** are **stable**.
- Change compared to two weeks ago: **+96** copies/mL (+6%).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (BB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Charlestown

Level: **Moderate**

- Average value in **CH** over the past week: **775** copies/mL.
- This value is **moderate** compared to past values and **lower** than the citywide average (**1,134** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **CH** are **stable**.
- Change compared to two weeks ago: **-16** copies/mL (**-2%**).

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Dorchester

Level: **Moderate**

- Average value in **DOR** over the past week: **1,024** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **DOR** are **stable**.
- Change compared to two weeks ago: **+21** copies/mL (**+2%**).

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

East Boston

Level: **Moderate**

- Average value in **EB** over the past week: **732** copies/mL.
- This value is **moderate** compared to past values and **lower** than the citywide average (**1,134** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **EB** are **stable**.
- Change compared to two weeks ago: **+85** copies/mL (+13%).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (EB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Hyde Park

Level: **Moderate**

- Average value in **HP** over the past week: **761** copies/mL.
- This value is **moderate** compared to past values and **lower** than the citywide average (**1,134** copies/mL).

Trend: ↗ **Increase**

- Over the past two weeks, values in **HP** are **increasing**.
- Change compared to two weeks ago: **+403** copies/mL (**+112%**).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (HP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Jamaica Plain

Level: **High**

- Average value in **JP** over the past week: **1,083** copies/mL.
- This value is **high** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **JP** are **stable**.
- Change compared to two weeks ago: **+95** copies/mL (+10%).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (JP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Mattapan

Level: **High**

- Average value in **MT** over the past week: **1,305** copies/mL.
- This value is **high** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: ↗ **Increase**

- Over the past two weeks, values in **MT** are **increasing**.
- Change compared to two weeks ago: **+274** copies/mL (**+27%**).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (MT);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Roslindale/West Roxbury

Level: **Moderate**

- Average value in **RS/WR** over the past week: **812** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **RS/WR** are **increasing**.
- Change compared to two weeks ago: **+155** copies/mL (**+24%**).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (RS/WR);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Roxbury

Level: **Very High**

- Average value in **RX** over the past week: **1,404** copies/mL.
- This value is **very high** compared to past values and **similar** than the citywide average (**1,134** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **RX** are **increasing**.
- Change compared to two weeks ago: **+244** copies/mL (**+21%**).

Updated: 11-Jul-2024 | Samples through: 07-Jul-2024 (RX);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

South Boston

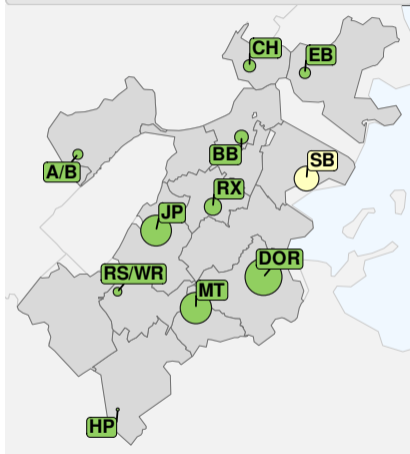

- As of 11-Feb-2024, sampling at the South Boston site has been paused indefinitely due to sewer construction
- Data for South Boston are shown through 11-Feb-2024

Site Status and Details

Status of Sampling Sites (11-Jul-2024)

#	Neighborhood	Date Site Confirmed	Site Status	Pop. Covered	% Neighborhood Covered
01	A/B	02-Oct-2022	Active	2,684	4.0%
02	CH	02-Oct-2022	Active	3,736	18.3%

Level and Trend Category Definitions

Concentration Levels

Concentration Level	Concentration Value (Copies/mL)
Very High	>1,400
High	1,050-1,400
Moderate	700-1,050
Low	350-700
Very Low	≤350

2-Week Trend Categories

	Trend Category	Trend Value (Copies/mL)
↑	Large Increase	>+500
↗	Increase	+150 to +500
→	Stable	-150 to +150
↘	Decrease	-500 to -150
↓	Large Decrease	≤-500

Level: **Very High**

Wastewater viral levels in your neighborhood indicate **very high risk** of COVID-19 infection.

Based on this level, BPHC urgently recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you are at [high risk of getting very sick](#), consider limiting non-essential indoor activities in public where you could be exposed.
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [isolation](#) if you have COVID-19 and for [what to do if you are exposed](#) to someone with COVID-19

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Find a [testing site](#) or pickup a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#).
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19: Know the Facts Find the Truth](#)

Level: High

Wastewater viral levels in your neighborhood indicate **high risk** of COVID-19 infection.

Based on this level, BPHC strongly recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [isolation](#) if you have COVID-19 and for [what to do if you are exposed](#) to someone with COVID-19

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Find a [testing site](#) or pickup a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#).
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19: Know the Facts Find the Truth](#)

Level: Moderate

Wastewater viral levels in your neighborhood indicate **moderate risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- If you are at [high risk of getting very sick](#), wear a [high-quality mask or respirator](#) in public indoor spaces
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [isolation](#) if you have COVID-19 and for [what to do if you are exposed](#) to someone with COVID-19

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Find a [testing site](#) or pickup a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#).
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19: Know the Facts Find the Truth](#)

Level: **Low**

Wastewater viral levels in your neighborhood indicate **low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [isolation](#) if you have COVID-19 and for [what to do if you are exposed](#) to someone with COVID-19

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Find a [testing site](#) or pickup a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#).
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19: Know the Facts Find the Truth](#)

Level: **Very Low**

Wastewater viral levels in your neighborhood indicate **very low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- Stay home when sick and avoid contact with others who are sick
- Improve [indoor airflow and ventilation](#)
- Wash your hands often and cover coughs and sneezes
- Follow CDC recommendations for [isolation](#) if you have COVID-19 and for [what to do if you are exposed](#) to someone with COVID-19

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Find a [testing site](#) or pickup a [free at-home test kit](#) in your neighborhood
- Find [treatment](#) for COVID-19 including [free telehealth](#) and [in home treatment](#).
- Call or visit the [Mayor's Health Line](#)
- Learn more about COVID-19 and find additional resources: [COVID-19: Know the Facts Find the Truth](#)
